Residents of the study area and its surrounding neighborhoods, as well as citizens interested in the study for its broader implications, attended and actively participated in a series of interactive workshops over the course of the study period. The findings and recommendations of the study as described in this draft report reflect that participation.

Over 244 people signed in at the workshop forums, as listed here. An indeterminate number participated but did not sign the register.

As components of the resultant plan progress towards implementation, continuing participation will be solicited from this database of interested citizens to ensure that the details of specific projects address the needs and reflect the visions that were established over the course of the study.
